

PowerSchool now offers middle school teachers the ability to do their grades online with the new PowerTeachers web based grade book. We want to restrict the roll out of this exciting new option to people who are aware of the possible challenges inherent with trying something new with technology. All that we have heard from field testers has been very positive. Before we enable the web based grade book for you, we need for you to acknowledge that:

1. You have visited the grade book on the EUSD demo server and acquainted yourself with the interface (http://www.eusd4kids.org/powerschool_faqs.htm)
2. You have visited the PowerTeacher Information page to review plusses and minuses of switching (<http://www.eusd4kids.org/powerteacher.htm>)
3. You understand that once the grade book is enabled, you cannot return to Power-Grade

I acknowledge all of the conditions above and request that EUSD enable the Power-Teacher web based grade book for me. I realize I must submit this application by 4:00 PM on Friday, August 24, 2007.
