

Heads – Up

Choose, randomly, one number from each of the 14 groups. Record the numbers in a place where the contestants can easily see them once the time begins.

1.	2,	8,	3,	6,	13,	9
2.	15,	12,	1,	6,	4,	8
3.	2,	12,	4,	7,	15,	10
4.	6,	4,	5,	15,	1,	3
5.	6,	4,	10,	13,	9,	1
6.	5,	1,	2,	15,	3,	9
7.	1,	5,	8,	4,	14,	2
8.	2,	11,	5,	3,	6,	14
9.	12,	5,	10,	4,	3,	8
10.	9,	3,	7,	1,	8,	12
11.	14,	2,	12,	11,	10,	1
12.	7,	2,	14,	11,	6,	5
13.	7,	10,	3,	2,	4,	12
14.	4,	1,	3,	8,	13,	10

The contestant has 3 minutes to complete the game-board.

Score: For each correctly complete equation, the score is the sum of the values used.

The equation has to be complete in order to earn the points.

Example of the ____ x ____ = ____ \pm ____

$$2 \times 7 = 12 + 2$$

$$3 \times 2 = 10 - 4$$

$$\square + \square = \square$$

$$\square - \square = \square$$

$$\square \times \square = \square \pm \square$$

$$\square \div \square = \square \pm \square$$

Total of the 14 numbers = _____

Sum of unused numbers = _____

Difference = _____

14 numbers

$$\square + \square = \square$$

$$\square - \square = \square$$

$$\square \times \square = \square \pm \square$$

$$\square \div \square = \square \pm \square$$

Total of the 14 numbers = _____

Sum of unused numbers = _____

Difference = _____

14 numbers

$$\square + \square = \square$$

$$\square - \square = \square$$

$$\square \times \square = \square \pm \square$$

$$\square \div \square = \square \pm \square$$

Total of the 14 numbers = _____

Sum of unused numbers = _____

Difference = _____

$$\square + \square = \square$$

$$\square - \square = \square$$

$$\square \times \square = \square \pm \square$$

$$\square \div \square = \square \pm \square$$

Total of the 14 numbers = _____

Sum of unused numbers = _____

Difference = _____

$$\square + \square = \square$$

$$\square - \square = \square$$

$$\square \times \square = \square \pm \square$$

$$\square \div \square = \square \pm \square$$

Total of the 14 numbers = _____

Sum of unused numbers = _____

Difference = _____

$$\square + \square = \square$$

$$\square - \square = \square$$

$$\square \times \square = \square \pm \square$$

$$\square \div \square = \square \pm \square$$

Total of the 14 numbers = _____

Sum of unused numbers = _____

Difference = _____

$$\square + \square = \square$$

$$\square - \square = \square$$

$$\square \times \square = \square \pm \square$$

$$\square \div \square = \square \pm \square$$

Total of the 14 numbers = _____

Sum of unused numbers = _____

Difference = _____

$$\square + \square = \square$$

$$\square - \square = \square$$

$$\square \times \square = \square \pm \square$$

$$\square \div \square = \square \pm \square$$

Total of the 14 numbers = _____

Sum of unused numbers = _____

Difference = _____
